Om fugemassen

Formoa® Colours er en enkeltkomponent MS-polymerbasert lim/fugemasse med utmerket værbestandighet når den utsettes for ekstreme forhold og krevende miljøer. Den fester seg til et bredt spekter av materialer med minimal overflatebehandling. Fugemassen har god vedheft på overflater som kompositt, fiberglass, PU-belagt stål, betong, mur, malte overflater, PVC / EPDM, etc.
